Forcepoint DLP for Email

Secure your organization's most vulnerable data channel - email

Forcepoint DLP for Email is a comprehensive solution designed to safeguard sensitive information, enhance email security, and streamline policy enforcement. Whether your workforce operates remotely or in the office, Forcepoint ensures secure access to business data while keeping malicious actors at bay.

Email remains the highest-risk channel for data exfiltration. Forcepoint DLP for Email can be deployed in the cloud or on-premises—including Microsoft 365, Google Workspace, and other popular email platforms—extending policy coverage and enhancing native email security capabilities in just minutes.

Industry-Leading Data Loss Prevention

Forcepoint DLP for Email provides the industry's largest DLP classifier library. This comprehensive set of over 1,700 pre-defined policies, templates, and classifiers empowers organizations to accurately identify and protect sensitive information, reducing false positives and negatives and ensuring effective risk mitigation.

Unified Policy and Incident Management Across All Channels

Forcepoint DLP for Email is part of Forcepoint's broader Data Security platform, delivering consistent policy enforcement across email, web, cloud apps, and endpoints from a single interface.

→ Deploy once and enforce everywhere

→ Monitor incidents in real-time via a unified dashboard

→ Simplify operations and reduce risk with centralized control

Agentless Solution for Comprehensive Coverage

Our agentless solution extends coverage to endpoints and Bring Your Own Device (BYOD) environments, eliminating deployment complexities and ensuring seamless protection without compromising user experience. Whether it's company-managed devices or personal smartphones, Forcepoint DLP for Email delivers complete oversight of sensitive data leaving the organization.

Advanced Email Security with Granular Control

Experience advanced email security features with granular control, allowing organizations to define and enforce policies tailored to their specific requirements. From encryption and quarantine to manager approval workflows and more, our solution provides comprehensive protection against evolving email threats.

Mail Client Agnostic

Our solution is mail client agnostic, supporting any email client without the need for additional agents. Experience seamless integration and protection across diverse email environments, ensuring consistent security standards across the organization.

Incident and Alerts Management

Gain a complete view of all incidents and alerts in real-time with a consolidated dashboard. Integrated reporting provides administrators with visibility across email cloud apps, web traffic, and endpoints.

Forcepoint DLP also provides

→ **Risk-Adaptive Protection** to automatically adjust enforcement based on user behavior and data sensitivity.

→ **Native Device Control** to protect USB and removable media.

→ **Forensics** to provide detailed insights into data movement and policy enforcement effectiveness.

Global Compliance

Achieve global compliance effortlessly with our out-of-the-box DLP templates covering over 160+ regions. Ensure adherence to regulatory requirements and industry standards, mitigating compliance risks and bolstering organizational resilience.
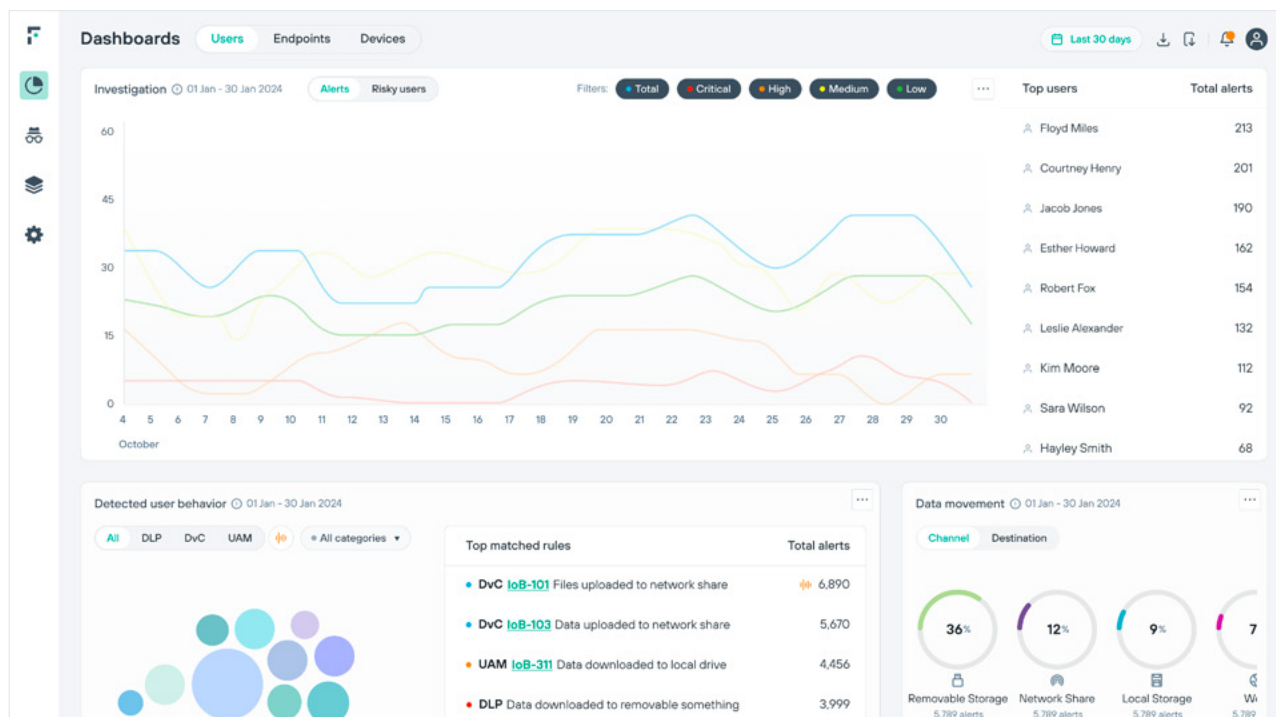

Powerful Data Security for the #1 Channel for Data Loss and Breaches

Forcepoint DLP for Email empowers organizations to safeguard their email communications effectively—whether hosted in the cloud or run on-premises. With industry-leading DLP capabilities, unified management, and advanced security features, the solution delivers unmatched protection for one of your most critical communication channels. Stay ahead of evolving threats, ensure compliance, and stop data loss—without slowing your business down.

→ Part of Forcepoint's unified data security platform, delivering visibility and control across email, endpoint, cloud, and web

→ Supports both cloud-native and on-premises deployment models to meet any regulatory or operational need

→ 99.99% uptime for cloud deployments with no scheduled downtime

→ Seamlessly integrates with Microsoft 365, Google Workspace, and any other email environment

Forcepoint DLP for Email Features and Benefits

FEATURE	BENEFIT
Integration with Microsoft 365, Google Workspace, and other major email platforms	Works seamlessly with leading email providers and clients—agentless architecture allows deployment across any email environment without endpoint installations
Supports cloud and on-prem deployment	Flexibility to meet compliance, regulatory, and operational requirements in any environment
99.99% uptime for cloud deployments	Leverages 1,700+ out-of-the-box classifiers and templates for accurate detection and protection
Unified management and incident visibility	Define and manage policies across email, cloud, web, and endpoint from a single console
Forensics and real-time reporting	Investigate incidents, track data movement, and enhance policy enforcement with a unified dashboard
