

Modernize Your Forcepoint DLP Investment

Built on trusted protection. Ready for what's next.

Organizations worldwide rely on Forcepoint DLP to protect their most sensitive data. As data moves across cloud applications, AI-driven workflows, SaaS apps, web, email and distributed work environments, operational expectations have changed.

Forcepoint provides a path to modernize your DLP deployment without starting over. Preserve your policies, expertise and trusted protection while unlocking the benefits of cloud-native management and continuous innovation.

Keep your protection. Unlock continuous innovation.

Modern Foundation

Cloud-native architecture designed for today's data landscape and challenges

Same Protection

Your DLP policies carry forward, no starting from scratch.

Unified Control

Endpoint, web, email, SaaS and AI workflows from one console.

Guided Modernization Journey

1. Assess

Review your environment, modernization goals, readiness and plan your path

3. Modernize

We guide you step-by-step with minimal disruption to your operations

2. Plan

Your team and our experts align on scope, timeline and required outcomes

4. Optimize

Hands-on support to unlock the full value of modern data security.

How to Begin

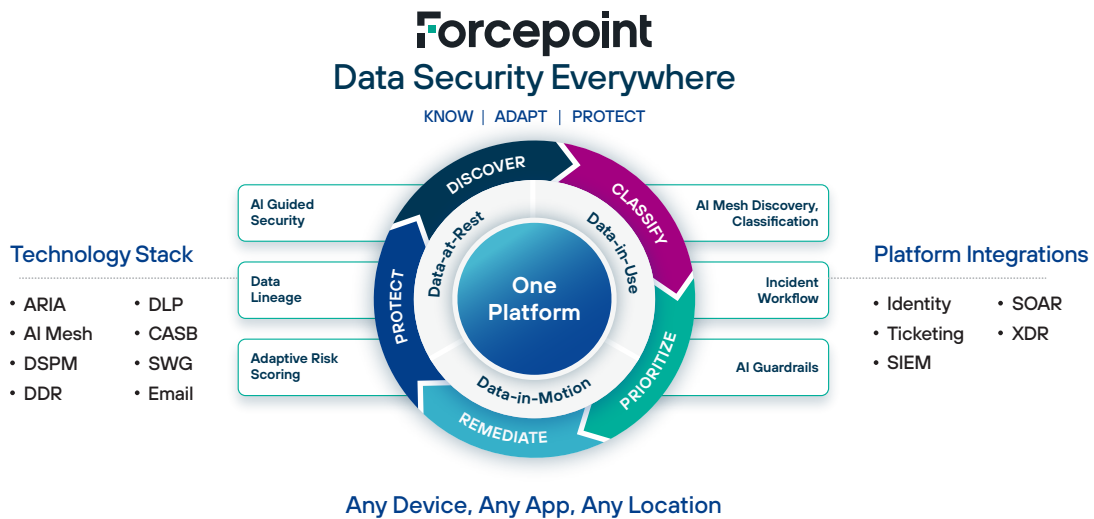

- **Cloud DLP Free Trial**
Start with a 30-day guided trial. Zero risk, instant endpoint protection.
- **Guided Migration**
End-to-end migration with Forcepoint experts – proven process, proven results.
- **Phased Approach**
Start with endpoint DLP, expand channel coverage when ready. No rush.

Program Benefits

- **No Cost to Start**
Begin your modernization journey with no upfront investment and a flexible path to Cloud DLP.
- **Expert Guidance Included**
Forcepoint experts throughout your journey, designed to help accelerate adoption and success.
- **Modernization with Confidence**
Dedicated program designed to simplify your transition while minimizing disruption to your business.

The Foundation for What's Next

Modernize data security without compromising the trusted protection you rely on today.

Modern Unified Security Architecture

Reduce infrastructure dependency and simplify operations via cloud-native management.

Protect Data Everywhere

Consistent protection across endpoint, web, email, SaaS and AI workflows.

Streamline Compliance

Centralize policy and incident management, reporting and enforcement across channels.

Future-Ready Data Security

Unlock the latest innovations across the Data Security Cloud platform, including DSPM, DDR, ARIA, CASB, Web and more.

Ready to Get Started?

Whether you're evaluating Cloud DLP, planning for renewal or exploring a long-term modernization strategy, Forcepoint can help you build the right path forward. Contact your Forcepoint account team to learn more.
