

FORCEPOINT DLP CASE STUDY

# **Crediton Dairy**

# Introduction

This case study of Crediton Dairy is based on a June 2018 survey of Forcepoint DLP customers by TechValidate, a 3rd-party research service.

"We now have a full understanding of what data is flowing through our network due to DLP Discovery. Being able to have the visibility of data and controlling what end users were doing has been vital in our rollout."

## Challenges

The business challenges that led the profiled company to evaluate and ultimately select Forcepoint DLP:

Their ability to control and manage data that are subject to regulation

# **Use Case**

The key features and functionalities of Forcepoint DLP that the surveyed company uses:

- Forcepoint's DLP helped them easily find and control regulated data or sensitive IP because it:
  - Scans files and discovers data they didn't know existed
  - Sets data loss prevention policies across network and endpoint one time and from a single console
  - Follows and limits usage of regulated data or sensitive IP with automated application of controls even when the data isn't on the network
- Reports that the ability to set policies just once utilizing Forcepoint DLP's single console control is extremely valuable.
- Rates Forcepoint DLP compared to competitive data loss prevention solutions they have used:
  - Effectiveness: best in class
  - Ease of use: best in class
  - Customer support: best in class
  - Transition to the cloud: better
  - Price: best in class
