

FORCEPOINT NEXT GENERATION FIREWALL CASE STUDY

City Of Renton

Introduction

This case study of City of Renton is based on a June 2018 survey of Forcepoint Next Generation Firewall customers by TechValidate, a 3rd-party research service.

"Easy to manage, great, extensive feature set and terrific support."

Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Forcepoint Next Generation Firewall:

- Replacing our then-current firewall (Cisco ASA) with an NGFW solution
- Evaluated the following vendors before choosing Forcepoint:
 - Cisco
- Addressed the following challenges after using Forcepoint Next Generation Firewall:
 - New firewall deployment
 - Deploying software updates

Use Case

The key features and functionalities of Forcepoint Next Generation Firewall that the surveyed organization uses:

- Chose Forcepoint because of the following capabilities:
 - High-availability clustering of up to 16 different devices
 - Strong IPS and anti-evasion defenses

Results

The surveyed organization achieved the following results with Forcepoint Next Generation Firewall:

- Less planned maintenance and fewer unplanned outages
- Reports that their end-user internet performance significantly improved as a result of moving to the Forcepoint Next Generation Firewall.
- Reports that their planned maintenance and unplanned outages were reduced from days to hours since using Forcepoint Next Generation Firewall.
