

Next-Generation Firewall

120 Series

Reliability and security for the distributed enterprise—introducing Forcepoint Next-Generation Firewall 120 Series with secure SD-WAN and optional LTE connectivity

The Forcepoint NGFW 120 Series enables remote offices, branches, and stores to securely connect directly to the cloud. This compact, desktop appliance offers integrated wireless and optional LTE as a single solution with secure SD-WAN, next-generation firewall security, advanced intrusion prevention, and anti-malware capabilities. The 120 Series is centrally managed via Forcepoint's renowned Security Management Center (SMC).

Key Features

- › Up to 4 Gbps throughput
- › Compact desktop design
- › Integrated switching
- › Wi-Fi
- › Two (2) Power over Ethernet (PoE+) ports for flexible deployment of peripherals
- › Multi-ISP SD-WAN and site-to-site Multi-Link™ connectivity
- › High-availability clustering
- › High-security NGFW with anti-evasion technology
- › Software and security policy updates with just a few clicks
- › Centralized management of up to 2,000 appliances at once
- › Endpoint-aware security policy enforcement
- › Integration with Forcepoint Web Security Cloud, CASB, and DLP
- › Optional Advanced Malware Detection (AMD) sandboxing
- › Optional URL Filtering powered by Forcepoint ThreatSeeker

Direct-to-cloud connectivity and security for the unbound enterprise

Digital transformation is all about connecting distributed workforces to the resources they need, no matter where they are. With applications and data moving to the cloud, organizations are increasingly finding that old "hub-and-spoke" networking, like MPLS, can't handle the demand. The Forcepoint NGFW 120 Series provides the networking and security needed to safely connect stores, branches, and remote offices directly to the internet for maximum productivity while providing industry-leading security so your teams can do more, with less.

Reduced costs and footprint with integrated SD-WAN, NGFW, Wi-Fi, and VPN

The Forcepoint NGFW 120OWL Series unites networking and security in a compact desktop appliance that is easy to install in even the smallest locations. It integrates multi-ISP SD-WAN connectivity, site-to-site Multi-Link™ VPN, and high-availability clustering with the industry's strongest next-generation firewall (NGFW) and intrusion prevention (IPS) security. The N120OWL model also provides comprehensive Wi-Fi and built-in switching that eliminates the need for additional boxes.

Like all Forcepoint NGFW appliances, physical as well as virtual, the Forcepoint NGFW 120 Series is centrally administered using the Forcepoint Security Management Center (SMC). Firewalls can be deployed throughout the world quickly, without an on-site technician, and updated with just a few clicks.

Advanced clustering for high availability

Every minute an organization is offline costs money. Downtime is not an option. That's why the Forcepoint NGFW 120 Series offers advanced clustering that allows multiple appliances (including other models of Forcepoint NGFW) to be used together to keep remote sites running even in the middle of software updates or hardware failure. Built-in SD-WAN traffic management enables links from more than one ISP to be used at the same time to further reduce the risk of outages. Redundancy in the management console and log services enables global deployments and helps to ensure your business stays connected securely, even during unexpected interruptions.

PERFORMANCE ¹	N120W	N120WL
NGFW/NGIPS throughput (HTTP 64kB payload)	450 Mbps	450 Mbps
Max firewall throughput (UDP 1518 byte payload)	4 Gbps	4 Gbps
Max inspection throughput (UDP 1518 byte payload)	800 Mbps	800 Mbps
TLS 1.2 inspection (44kB payload)	130 Mbps	130 Mbps
IPsec VPN AES-GCM-256	1.8 Gbps	1.8 Gbps
Mobile VPN clients	Max 25	Max 25
Max concurrent IPsec VPNs	18,000	18,000
Max concurrent inspected HTTP connections	40,000	100,000
Max concurrent connections	3.2 Million	7 Million
New TCP connections/sec	48,000	48,000
VLAN tagging	Unlimited	Unlimited
Virtual contexts default/max	3 / 3	3 / 3

¹ Performance values reflect maximums measured under test conditions and may vary based on configuration and features enabled

NETWORK INTERFACES	N120W	N120WL
Fixed Ethernet interfaces	8 GE RJ45	8 GE RJ45
Power over Ethernet (PoE+) ports	2 x 30W ²	2 x 30W ²
Wi-Fi	IEEE 802.11 ac/a/b/g/n	IEEE 802.11 ac/a/b/g/n
Switched ports ³	8	8
Connectors	2 USB, 1 serial	2 USB, 1 serial
Wireless	-	LTE ^{3,4}

² Power over Ethernet requires PoE+ adapter sold separately

³ Ports can be used as switch ports or layer 3 interfaces

⁴ Supported LTE bands: B1, B2, B3, B4, B5, B7, B8, B12, B13, B14, B17, B18, B19, B20, B25, B26, B28, B29, B30, B32, B34, B38, B39, B40, B41, B42, B46, B48, B66, B71

ORDERING ⁴	N120W	N120WL
NGFW appliance	N120W	N120WL
Power over Ethernet (PoE+) adapter	ACP120PoE	ACP120PoE
URL filtering	FPURL2X	FPURL2X
Advanced Malware Detection	FPAMD2X	FPAMD2X
AC power supply	ACP120	ACP120
120 Series spare part SSD	ACM8	ACM8
Appliance Spare Unit	N120WSPU	N120WLSPU
