

Next-Gen Firewall Feature Comparison

Schedule a Demo

Forcepoint Next-Gen Firewall combines fast, flexible networking (SD-WAN and LAN) with industry-leading security to connect and protect people and the data they use throughout diverse, evolving enterprise networks. Forcepoint Next-Gen Firewall provides consistent security, performance, and operations across physical, virtual, and cloud systems. It's designed from the ground up for high availability and scalability, as well as centralized management with full 360° visibility.

Rating key:

- Great
- ◐ OK
- Poor

Forcepoint business outcomes:

- Faster rollout of branches, clouds, or data centers
- Less downtime
- Greater security without disruption
- Fewer breaches
- Less exposure to new vulnerabilities while IT teams prepare to deploy new patches
- Lower TCO for network infrastructure and security
- Apply a Zero-Trust approach to network security with granular user, access, and policy controls

DISCLAIMER: Product comparison is based on in-product capabilities and cross-portfolio integrations available from the same vendor as of April 7, 2021. Comparisons do not include integrations with third-party vendors. Feature comparison is based on each vendor's most recent and modern version available as of April 23, 2021. Information is based off of data collected from public websites and forums, analyst papers, Cyber Rating <https://cyberratings.org/publications/enterprise-firewall-overview/>, and product datasheets as of April 23, 2021.
