

 **FORCEPOINT**  
**CDM Solutions Overview**

# Fortify Government Networks & Systems with CDM Tools from **Forcepoint**

## **Forcepoint User and Data Security**

Solves government insider threat challenges with complementary products Forcepoint DLP (Data Loss Prevention), Forcepoint UEBA (User & Entity Behavior Analytics) and Forcepoint Insider Threat.

## **Forcepoint Cloud Security**

Supports government agencies as they move to the cloud with Forcepoint Email Security and Forcepoint Web Security.

## **Forcepoint Network Security**

Combines the best of both worlds: Forcepoint NGFW's advanced security and centralized manageability plus the robust protection of the government-required Sidewinder Security Proxies.

## **Forcepoint Brings More Than 20 Years Of Expertise Supporting Intelligence, Defense And Civilian Agencies Around The World.**

Forcepoint's products have been accepted into the Continuous Diagnostics and Mitigation (CDM) program for Phase Three. The CDM program enables government agencies to expand their continuous monitoring capabilities by increasing their network sensor capacity, automating sensor collections and prioritizing risk alerts. The products available through CDM and our human point system solve the greatest security challenges agencies face today.

Forcepoint's solutions support the unique and complex missions and objectives security professionals take on to protect national interests. Our human-centric approach focuses on the intersection of people, data and networks. This is what we call the human point where we integrate solutions and services to deliver security that works with and for users, enabling them to effectively and efficiently accomplish their missions.

Forcepoint solutions are deployed in some of the largest global enterprises, supporting the world's most high consequence missions. As a result, Forcepoint has been recognized as a market technology leader by numerous third party analysts and researchers.

From intelligence communities to defense departments and civilian agencies, cyber professionals require rapid, accurate and secure means to interact with technology and data, wherever and however they may access it.

# User and Data Security

## Forcepoint Insider Threat

Enables safe and effective use of mission-critical technologies by capturing technically observable human behaviors that include policy violations, compliance incidents, or malicious acts that may be warning signs of an impending breach. Our Insider Threat solution provides all the details, insight, and complete context using video replay to immediately assess the severity of the threat, remediate the problem, and build the policies to prevent it from happening in the future. [www.forcepoint.com/product/data-insider-threat-protection/forcepoint-insider-threat](http://www.forcepoint.com/product/data-insider-threat-protection/forcepoint-insider-threat)

## Forcepoint DLP

A powerful Data Loss Prevention (DLP) tool that helps you secure intellectual property, personally identifying information (PII), and other sensitive data – wherever it resides – on endpoints, in the cloud, or on-premises. Apply behavioral analytics and machine learning to cluster DLP incidents in order of business risk with Incident Risk Ranking (IRR), so your response teams focus on areas of greatest risk. For even greater protection against malicious or careless insiders, combine Forcepoint DLP with Forcepoint Insider Threat. [www.forcepoint.com/product/data-insider-threat-protection/forcepoint-dlp](http://www.forcepoint.com/product/data-insider-threat-protection/forcepoint-dlp)

## Forcepoint UEBA

A User and Entity Behavior Analytics tool that enables your security team to proactively monitor for high risk behavior inside the organization. Our security analytics platform provides unparalleled context by fusing structured and unstructured data to identify and stop malicious, compromised and negligent users. We uncover critical problems such as compromised accounts, espionage, intelligence theft, and fraud. # Forcepoint Risk Adaptive Protection

Forcepoint’s Human Point System portfolio is strongest when solutions are used together. One example is the combination of Forcepoint DLP and Forcepoint UEBA to achieve risk adaptive protection for your agency.

Risk adaptive protection dynamically applies monitoring and enforcement controls to protect data based on the calculated behavioral risk level of users and the value of the data accessed. This allows your agency to better understand risky behavior and automate policies, dramatically reducing the quantity of alerts requiring investigation.

Using these solutions in tandem provides agencies with the ability to maintain optimum workday efficiency and confidence that Forcepoint DLP enforcement policies will automatically adjust if account behavior begins to exhibit activity out of the norm.

# Protecting agencies' most sensitive information on all networks

## Cloud Access and Gateway Security

### Forcepoint Email Security

Protect your users against multistage advanced threats that often exploit email to penetrate your IT defenses. Our unrivaled email security applies thousands of real time threat analytics, behavioral sandboxing and other advanced defense technologies to identify targeted attacks. *FedRAMP In Process* [www.forcepoint.com/product/cloud-security/forcepoint-email-security-cloud](http://www.forcepoint.com/product/cloud-security/forcepoint-email-security-cloud)

### Forcepoint Web Security

A Secure Web Gateway that stops advanced threats from getting in and sensitive data from getting out, whether your users are in the office, working from home or in the field. Our cutting-edge classification engine, global threat intelligence, advanced malware detection and enterprise-class DLP work together for industry-leading security that's easy to deploy in the cloud, on-premises or in a hybrid environment. *FedRAMP In Process* [www.forcepoint.com/product/cloud-security/forcepoint-web-security-cloud](http://www.forcepoint.com/product/cloud-security/forcepoint-web-security-cloud)

## Network Security

### Forcepoint NGFW

Integrates application control, sophisticated evasion prevention and an intrusion prevention system (IPS) into a single solution that is cost-effective and easy to deploy. It has a proven capability to identify advanced evasion techniques (AETs) that evade other devices, and delivers exfiltration protection using both application and endpoint intelligence. Forcepoint NGFW optimizes and scales network security for your distributed enterprise with lower infrastructure costs and far less downtime. ## The Human Point System

Forcepoint's products work together across a range of capabilities and underlying services for an innovative approach to security that uses risk-adaptive scoring to recognize the context and intent of user behavior for early and accurate threat detection. It cuts through the noise so you know where to focus.

Changing from point solutions to integrated technology platforms with threat intelligence and analytics starts to streamline operations and will reduce total ownership costs while improving performance. The Defense-In-Depth approach to security is a proven and sound philosophy, but should be implemented with the understanding the solution does not have to be Vendor-In-Depth. Vendor consolidation is an important piece of the security puzzle because it provides a more unified solution, greater performance, and fewer points of integration conflict.

Forcepoint assists customers to transform their cybersecurity infrastructure through platform integration and point product consolidation. Comprehensive design and deployment of network segmentation across multiple security enclaves is paramount for protection of data. Physical segregation of internal and external networks to reduce the attack surface combined with secure operating systems and secure multi-level access and transfer solutions for usability is a fundamental element for critical infrastructure protection.

Forcepoint has successfully enabled customers in these duties using cross domain and firewall approaches and applicable technologies while seamlessly protecting against insider threats.

It is pivotal to have a 360 degree view of the threat, whether it's originating from outside or inside is imperative. The protection against insider threats (accidental and malicious) as well as outside attackers, ability to rapidly detect breaches, and minimize "dwell time" (the period between compromise and remediation), and stop theft all within a single "pane of glass" is possible. Working with cyber experts who have experience securing users and data across the networks and within a threat landscape that continues to escalate, evolve and become more and more challenging is a requirement for success.

Forcepoint brings skills to simplify compliance, improve decision-making, and streamline security. Our modular, end-to-end architecture design and complimentary solutions eliminate the waste of managing a patchwork of point products and the avalanche of data they produce while reducing total ownership costs. We automate routine tasks, empowering civilian agencies to focus on innovation rather than being distracted by threats or breaches resulting in better access to information while defending more effectively against cyber threats and vulnerabilities.

A busy city street scene with many pedestrians walking. The background is blurred, showing cars and traffic lights. The text is overlaid on the left side of the image.

# Simplify and streamline security with the Human Point System and CDM

## **ABOUT FORCEPOINT**

Forcepoint is transforming cybersecurity by focusing on what matters most: understanding people's intent as they interact with critical data and intellectual property wherever it resides. Our uncompromising systems enable companies to empower employees with unobstructed access to confidential data while protecting intellectual property and simplifying compliance. Based in Austin, Texas, Forcepoint supports more than 20,000 organizations worldwide. For more about Forcepoint, visit [www.forcepoint.com](http://www.forcepoint.com) and follow us on Twitter at [@ForcepointSec](https://twitter.com/ForcepointSec).
