

The Total Economic Impact™ of a Forcepoint Cross Domain Solution

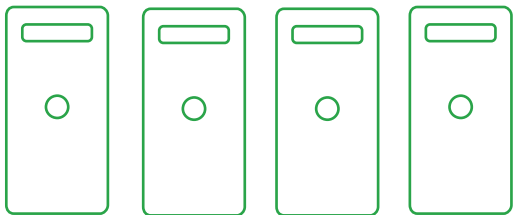

GAIN USABILITY WITHOUT COMPROMISING SECURITY

Forcepoint commissioned Forrester Consulting to analyze the total economic impact of Forcepoint Trusted Thin Client, Trusted Gateway System and Trusted Print Delivery on an existing Department of Defense intelligence agency customer.

See how that agency gained usability without compromising security and saw significant results in responding to key challenges.

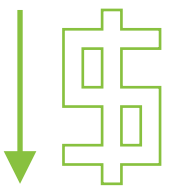

▶ KEY CHALLENGES PRIOR TO IMPLEMENTATION

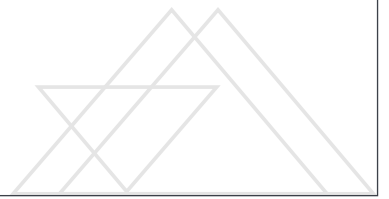

four separate networks at differing levels of security clearance

18 x 
18 site locations

pressure to reduce spending associated with information technology

“Without Trusted Thin Client, our operations team would have needed to be double the size to keep up with the demand.” – Senior Integration Engineer

▶ KEY RESULTS¹

\$1.3 MILLION Operations labor savings

239% Return on Investment

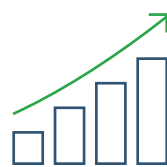

\$2.5 MILLION Hardware and maintenance savings

Payback in **13.1 MONTHS**

\$4.0 MILLION Total benefits savings

Net Present Value: **\$2.8 MILLION**

“Trusted Gateway System is so much an ingrained part of our day to day operations that it’s very difficult to imagine supporting our mission without it–there’s no practical alternative.” – Senior Integration Engineer
