Are you aware of the hidden risk and cost of your data?

Your data can be an asset or a liability. You need to know the difference.

Maximum amounts of data hide away in multiple clouds, data centers, and devices. Not knowing where it is stored, if it is IP or PII increases your risk of data loss and non-compliance.

Get smarter, faster, and with more accuracy with Forcepoint Data Visibility.

Gain a 360° view of all your data for maximum security and control.

What makes Forcepoint Data Visibility different.

→ 98%+ classification accuracy across 70 classification fields
→ AI and ML models based on hundreds of millions of files from multiple companies and industries
→ Continuous self-learning for increased personalization and accuracy
→ Classification suggestions are straightforward to move files, folders, or entire collections
→ Enhanced data visibility reduces DLP false positives, data breaches and exfiltration
→ Least privileged access to all data strengthens your zero trust security initiatives

Meet the challenge of massive amounts of data hidden away in multiple clouds, data centers, and devices. Get a holistic view of all your data, including what’s hidden within it and where it lives. Make sure you only have access to what you need.

Reducing the risk of data loss.

Real discovery scanning.

Quickly scan terabytes of data across servers, multiple clouds, laptops, and desktops.

AI-assisted accuracy.

AI- and ML-based document classification and tagging for superior efficiency and accuracy.

Out-of-box value.

Industry-leading turnkey solution with a highly customized classification ML model, representing a broad cross section of companies and industries.

Gain a 360° view of all your data for maximum security and control.

Zero trust.

Ensure "principle of least privilege" by giving access to only the files users need, nothing more.

"ROT" purging.

Defensibly delete redundant, obsolete, and trivial data to reduce compliance risk and data breaches.

In-depth dashboards.

Context and pathing for every file discovered. Enable filtering to view all PII, high risk files, creation dates, modification dates, file permissions and file sensitivity.

About Forcepoint

Forcepoint simplifies security for global businesses and governments. Forcepoint’s all-in-one, truly cloud-native platform makes it easy to adopt Zero Trust and prevent the theft or loss of sensitive data and intellectual property no matter where people are working. Based in Austin, Texas, Forcepoint creates safe, trusted environments for customers and their employees in more than 150 countries. Engage with Forcepoint on www.forcepoint.com, Twitter and LinkedIn.
