

CDM THE NEXT CHAPTER

MeriTalk's "CDM: The Next Chapter" report, underwritten in part by Forcepoint, surveyed more than 100 CDM stakeholders in April 2020 to explore how the Continuous Diagnostics and Mitigation (CDM) program is evolving to protect critical cloud and mobile environments.

The Central Story

81%

of CDM stakeholders give agencies a passing grade for program adoption to date

BUT

90%

believe cybersecurity adversaries are out-pacing agencies' best efforts

68%

say CDM is not adapting fast enough to protect growing cloud and mobile environments

Time to Turn the Page

90%

While 90% feel **visibility for cloud and mobile devices** must be as good as or better than visibility on-prem,

50%

just half are **taking key steps** to apply CDM principles to these areas

45%

Additionally, agencies estimate just 45% of their current **CDM processes are automated**

Success in the Next Chapter

Stakeholders say cloud computing, automation, and zero trust are critical to CDM's long-term success

CLOUD COMPUTING

AUTOMATION

ZERO TRUST

Forcepoint helps Federal agencies eliminate security blind spots, providing unrivaled visibility and a single policy to protect data, wherever it is.
